#### Chapter 22 Respiratory System Part 2 - YouTube

Measurement of respiratory rate is a vital sign. Nurses need to understand the anatomy and physiology of normal breathing to measure respiratory rate and interpret findings. The second in our five-part series on respiratory rate describes the process of breathing and how it is affected by ill health.

#### Respiratory rate 2: anatomy and physiology of breathing ...

respiratory control centers: The medulla which sends signals to the muscles involved in breathing, and the pons which controls the rate of breathing. chemorecepters: These are receptors in the medulla and in the aortic and carotid bodies of the blood vessels that detect changes in blood pH and signal the medulla to correct those changes.
