My three-year-old nephew, though, loves the illustrations in 'Anansi Goes to Lunch' because he is learning to count, and he delights in counting Anansi's six arms--three in each sleeve! My nephew's theory on the arms (despite the fact the Anansi is supposed to be a spider) is that the character needs all those arms to hold all the food he wants to take at the lunch parties.

Anansi's eyes prove to be a little too big for his stomach in Bobby and Sherry Norfolk's entertaining and sprightly Anansi Goes to Lunch. With roots in African folklore, this charming tale humorously illustrates how Anansi becomes, quite literally, stretched too thin after shortsightedly accepting three lunch invitations at the same time.

He gives each of his hosts a rope to tug, ties the other end around his own waist, and waits to be summoned when the food is served - but when all of the food is ready at the same time, Anansi is caught in the middle! That's why Spiders have small waists today.
