Pythagoras didn't just do triangles, he also did this joke self-draining cup that's gone viral 2,500 years later. In phrases you don't hear too often, Pythagoras has just gone viral with this rather brilliant cup that lots of people are coming across for the first time. Turns out the Ancient Greek philosopher didn't just do triangles – obviously he did lots more than that – he also designed this.

The Pythagorean Theorem relates to the three sides of a right triangle. It states that  $c^2=a^2+b^2$ , C is the side that is opposite the right angle which is referred to as the hypotenuse. A and b are the sides that are adjacent to the right angle. The theorem simply stated is: the sum of the areas of two small squares equals the area of the large one.
